DATA SHEET

Backup & Restore

Protect and secure your Salesforce data, and get complete data restoration to ensure business continuity.

Accidents happen. Protect business continuity with Salesforce Backup & Restore designed for the most dynamic and intricate implementations.

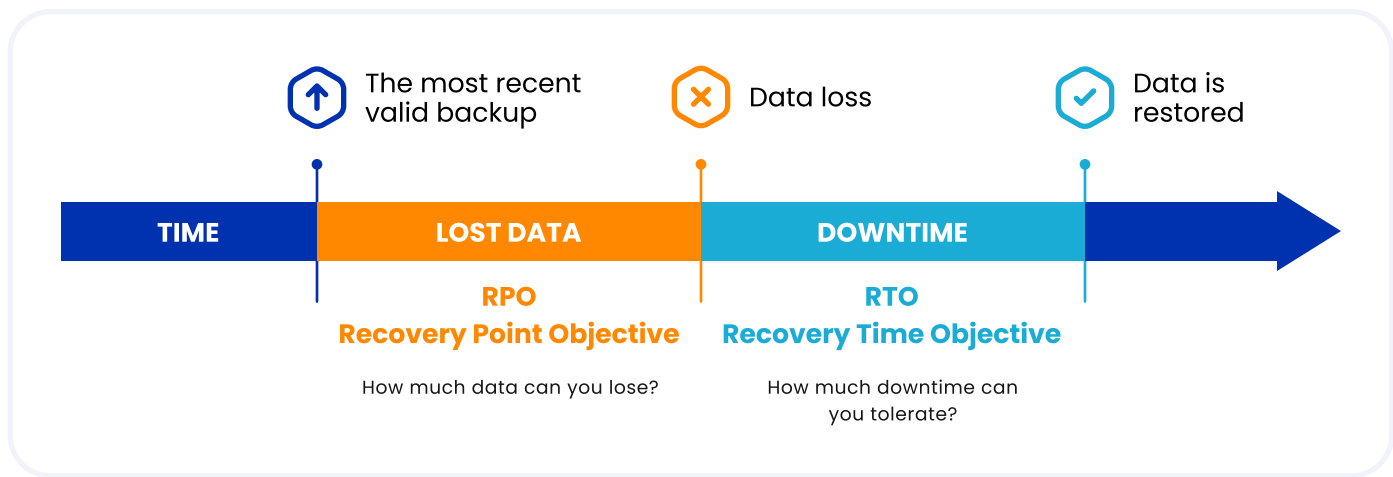

At Enterprise scale, Salesforce data is different: API limitations, Large Data Volumes or relationship model will impact RTO and RPO.

Choose a backup provider with deep Salesforce data experience and the ability to handle enterprise complexity.

Odaseva offers Salesforce CoEs the fastest and safest path to recovering data, metadata, and files.

50%

of Salesforce implementations' data loss and corruption is caused by human error (Forrester, 2021)

Designed for scale. Designed for the enterprise.

Secure your mission-critical Salesforce data to protect against common threats like data loss, corruption, and non-compliance.

Charles-Emmanuel Sabourin
Engineering Manager, Axa

"We have a very customized org with a lot of data. We were not even sure a backup solution could handle such high volumes. It quickly became clear that being able to rely on experts to help optimize the backup plan and manage the load on the different APIs is a huge time saver. I would recommend Odaseva to any large Salesforce customer."

Protect and secure your Salesforce data, and get complete data restoration to ensure business continuity.

Salesforce Enterprise requires dedicated Backup & Restore

Salesforce is responsible for the integrity of the platform, and you’re responsible for your data. That means every user, integration, and automation has the potential to grind your business to a halt.

MANAGED BACKUP SERVICES

Experts customize your backup plan so you don’t have to. We configure and optimize your backup plan, monitor your data, and notify you if something is amiss.

ODASEVA UNDO

Restoring the right value has never been easier. Enable end-users to quickly and easily correct simple mistakes in production with our managed package.

RESTORE WIZARD

Accelerate time to recovery with guided restore flows adapted to all data loss scenarios, from single record to complete rollback or targeted metadata.

MONITORING ANALYTICS

Monitor all your data movements in one centralized view. Identify updates, creations, and deletions to quickly pinpoint incidents and anticipate reaching governor limits.

TRUSTED BY

Deloitte.

THE SALESFORCE ENTERPRISE PARTNER OF CHOICE

Restore Multiple Records

- Find affected records by selecting objects and an incident date >
- Enter a list of record IDs >
- Get records from a past backup >
- Select affected records with a direct query in Salesforce >
- Upload a CSV of records IDs >
